

PROJECT REGISTRATION FORM

-----FOR WARRANTIED PROJECTS ONLY-----

Page 4 **MUST** be signed before submission. Form instructions are located on page 5.

SCOPE ATTACHED (KSA Use Only)
 APPROVED W/COMMENT (Please review pg. 4)

[1] GENERAL PROJECT INFORMATION

Project Name/Ref: _____ PROJECT NUMBER (KSA Use Only): _____
Tax Exempt: No Yes – Certificate Required
Address: _____
City: _____ State: _____ Zip: _____ Country: _____
Project LEED Certification Level: Unknown Certified Silver Gold Platinum
Building Owner Name: _____ Company: _____
Phone #: _____ E-mail: _____
Specifier's Name: _____ Company: _____
Phone #: _____ E-mail: _____
Kemper System America Sales Rep: _____

Const. Type: New Construction Tear-off to Deck Roof Recovery
Project Type: Non-Insul. Roof Insulated Roof Green Roof Inverted Roof Plaza Deck Balcony
 Terrace Planter Cornice/Ledge Detention Tank Water Feature Parking Struct.
 Flashing Only Bathroom/Pan Interior Floor Other Application Type: _____
Building Type: Res. 1- Fam Commercial Government Res. Multi-Fam Industrial Hospitality
 Medical Military Transport Educational Religious High-rise

Anticipated Project Size: _____ Ft² Kemper Application Start Date: _____

Additional Quality Assurance: Electronic Field Vector Mapping (EFVM) Test Vector Mapping Grid (VMG)
Requires submission of the Electronic Leak Detection Testing Agreement (QSF425) to ILD@kempersystem.com
 Other Test Type (Describe): _____

[2] REQUESTED WARRANTY *MUST MEET MINIMUM QUALIFICATIONS*

Refer to Warranty Availability and Fee Schedule for project eligibility description of warranties and associated fees.

Premier NDL Watertightness Warranty 10 Year 20 Year 25 Year 30 Years¹
For fully reinforced waterproofing/roofing applications only. Min requirement: 1,000 sq. ft. & Must be Edge to Edge
 Single Source Option¹ (Preapproval required)
 Surfacing/Coating Coverage 5 Year 10 Year
PREMIER RIDERS (Special requirements apply)
 Overburden Removal & Reinstallation Rider (overburden that is easily removable, weight limit up to 50 lbs./unit)
 Wind Coverage Rider 125 mph 150 mph
¹ Limited availability – Select projects only. Special technical requirements may apply, including the EFVM test.
 Select Warranty Min requirement: 500 sq. ft. 10 Year² 20 Year^{3,4}
² For 1K Aqua Unreinforced Maintenance Coating (Mod Bit, Single Ply)
³ For 1K Aqua Fully Reinforced Maintenance Coating (Mod Bit, Single Ply)
⁴ For 1K Aqua Fully Reinforced and Unreinforced Maintenance Coating (Metal Roofs ONLY)
 Material Only Warranty 5 Year 10 Year 20 Year
Field inspections are not required for warranty issuance.

Other Warranty Requests – Describe: _____
Disclaimer: Submission of this form does not constitute approval or acceptance of this project for installation or warranty. Kemper System America, Inc. ("KSA") will issue a warranty only under the terms and conditions described in the Applicator Agreement and the warranty. NO OTHER WARRANTIES ARE MADE OR IMPLIED; ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE EXPRESSLY EXCLUDED. Prior to release of any materials, KSA's Technical Department must review, sign and return a copy of this form to the applicator. Review of project information and performance of on-site field inspections by KSA is solely for the benefit of KSA and for the purpose of evaluating eligibility of the project for a warranty. KSA makes no representation regarding, and assumes no liability for, the adequacy of the design of this building, the sufficiency of the roofing/waterproofing system or substrate components to accept the Kemper System or any materials not supplied by KSA. Corrections or comments made during this review do not relieve the applicator from compliance with the Applicator Agreement or Applicator's contract with the Owner. The applicator is responsible for confirming and complying with all local building and/or jurisdictional codes, and correlating all materials, quantities, dimensions, application processes, techniques of installation, and performing all work in a safe and satisfactory manner.

[3] STRUCTURAL CONSTRUCTION TYPE

Deck/Main Substrate Type

- Structural Concrete w/Topping Slab
- Precast Concrete w/Topping Slab
- Metal (Type & Gauge) _____
- Plywood (Thickness) _____
- Wood Plank (Type & Thickness) _____
- Other _____

Wall/Flashing Substrate Type

- Structural Concrete
- Precast Concrete
- Concrete Block
- Brick/Terra Cotta/Stone (Type) _____
- Metal (Type & Gauge) _____
- Plywood (Thickness) _____
- Cement Board (Type & Thickness) _____
- Other _____

Roof Deck Slope: _____ % or _____ per foot

[4] SUBSTRATE UNDER NEW KEMPER SYSTEM / COELAN (Review Substrate Primer Selection Guide)

Structural Substrate

- Structural Concrete (Scarify, shot blast, or prep with a diamond cup)
- Precast Concrete (Must be structurally secured together, strip in joints with Kemperol 500/120 fleece strip)
- Metal Decking/Corrugated/Standing Seam/Flat Seam (Grind to rough surface – wire brushing is **NOT** accepted)
- Plywood (Strip in joints with a Kemperol 500/120 fleece strip)
- Wood Plank (Plywood, cement board, or cover board required)
- Concrete Block (Fill all mortar joints flush, grind to rough surface)
- Brick/Terra Cotta/Stone (Fill all mortar joints flush, grind to rough surface)

Existing Roof System

Requires an adhesion test by KSA Field Technical Services (if not being removed)

- Asphalt BUR
 - Gravel Surfaced (Remove all gravel surfacing)
 - Smooth
 - Mineral Surfaced Cap Sheet
- APP/SBS Modified Bitumen Membrane
 - Smooth Membrane
 - Mineral Surfaced Membrane
- Existing Kemper System
- Single Ply Roof Type: _____
- Metal Roof System (Type & Gauge): _____
- Other Existing Roof System: _____

New Roof Assembly

Vapor Barrier / Temporary Roof

Moisture Mitigation System

- Kemperol SBS Base¹
- AC Tech 2170FC
- Kemperol SBS Cap¹
- Other Product: _____

Application:

- Torch-Applied
- Cold-Adhesive
- Self-Adhered

Rigid Insulation

- Hunter H-Shield
- Hunter H-Shield CG
- Other Product: _____

Cover Board (1/2" Min) (Joints to be stripped in for Liquid-applied applications)

- USG Securock Cement Board
- USG Securock Gyp Fiber Board²
- Other Product: _____
- Dexcel Cement Board

Cover Board and Insulation Attachment (Confirm attachment patterns for wind uplift requirement)

- Millennium 1-Step Adhesive
- Olybond 500
- Other Product: _____
- Millennium PG-1 Adhesive
- Dupont Insta Stik Adhesive
- Trufast Fastener
- OMG Fastener

¹A Primer may be required prior to application

²For applications with Kemperol SBS Modified Bitumen direct to Gyp Fiber board ONLY

[5] NEW KEMPER SYSTEM / COELAN

KEMPEROL Cold-Liquid Applied, Fully Reinforced System

| <input type="checkbox"/> Wood Decking (Drainage Board or Pedestals Required) | | |
| <input type="checkbox"/> Other Overburden (Describe): | | |

[7] APPLICATOR'S PROJECT REGISTRATION CERTIFICATION STATEMENT

Applicator hereby certifies this roofing and/or waterproofing application will be installed in accordance with the terms of the Applicator Agreement between the parties, AND in strict accordance with current Kemper System America, Inc. application instructions, installation requirements, and construction details. Applicator agrees to prepare all substrate surfaces as required by KSA, to assume full responsibility to determine substrate moisture content throughout the progress of work, and to only apply KSA materials to prepared, clean and dry substrates with a moisture content of five (5) percent less and/or Relative Humidity (ASTM 2170) reading of 75% or less. Applicator shall indemnify, reimburse and hold harmless KSA for and from any claims, losses or expenses, including attorney fees that relate to Applicator's failure to comply with this paragraph. **NO WORK** shall commence prior to Applicator receiving written acceptance of project by KSA Technical Department.

COSMETIC WAIVER

The roof coating systems installed by KSA approved roofing contractors are designed to waterproof and extend the life of a roof. KSA products and systems can alter the appearance of a roof, as KSA coatings are field applied and not factory applied. KSA coatings, once applied, are exposed to environmental conditions that can also alter the appearance of the roof. Although these factors may and often do alter or affect the cosmetic appearance of a roof, they do not affect the performance or intended purpose of KSA products and systems to waterproof and protect so long as the products are installed and maintained in accordance with manufacturer's recommendations.

By signing this Project Registration Request Form, all parties acknowledge that KSA roof coating systems may affect the appearance of the roof. Further, all parties acknowledge and understand that KSA makes no warranties, either express or implied, regarding the appearance of the roof after application or installation of KSA products and hereby waive all claims against KSA related thereto.

ROOF MAINTENANCE REQUIRED

The intent of preventative maintenance is to enable building owners to proactively identify and implement solutions to roof system problems before they become widespread. In many cases, if a problem is identified early and properly repaired, the extent and cost of repairs will be significantly less than if problems were unattended. An annual roof system maintenance site review should be performed by a professional roofing contractor. For warranted work using Kemper System products, the site review should be performed by the approved contractor who performed the original work. During a site review, it is recommended that any debris or other materials that do not specifically belong on the roof be removed. If repairs are necessary, routine repairs sometimes can be carried out immediately. If repairs cannot easily be made at the time of the site review, they should be implemented as soon as possible to avoid further roof system deterioration.

The following are required to be received by KSA prior to issuance of any warranties. Completed Project Registration Form, Job Photos, completed Project Warranty Request Form, Invoice(s) of 1K Aqua products, all applicable warranty fees and the Contractor Application and Contractor Agreement (for first time installer of 1K Aqua products only) We understand that the warranty will not be issued or in force until all KSA invoices, including applicable warranty fees, have been paid in full, all required documents have been completely filled out and submitted to KSA, and the project has been satisfactorily completed per KSA Technical Guidelines.

Applicator Firm Name: _____
(The Authorized Contactor that will install the Kemper System / Coelan products.)

Address: _____

City: _____ **State:** _____ **Zip:** _____ **Country:** _____

Company Officer Name: _____ **Title:** _____

Email Address: _____ **Phone:** _____

Contractor of Record Name: _____

(The Contractor name that will appear on the Warranty, if different from Applicator Firm name.)

Address: _____

City: _____ **State:** _____ **Zip:** _____ **Country:** _____

Email Address: _____ **Phone:** _____

COMPANY OFFICER SIGNATURE: _____ **Date:** _____

Check here if job start-up assistance and/or applicator training requested. **Job start assistance is required for all new applicators. Note: Minimum 14-day notice required for all job start assistance.**

[8] PROJECT PLAN, DETAILS & PICTURES

NOTE: Please submit a plan for all projects indicating the areas of work. For multiple project areas, attach additional pages as required to the back of form, and list each location and/or floor number separately below. Please email pictures of existing conditions for review to project@kempersystem.com.

FOR KEMPER SYSTEM AMERICA, INC. TECHNICAL DEPARTMENT USE ONLY

Certified: Expiration Date: _____ Refresher / Recertification: _____ New: _____

Approved (see comments) By: _____ Title: _____ Date: _____

Comments:

PROJECT REGISTRATION FORM INSTRUCTIONS

Project Registration Form must be used to register all Kemper System and Coelan projects, in accordance with the KSA "POLICY AND PROCEDURES FOR APPLICATIONS."

Please follow the following instructions when using the Project Registration Form:

Pages 1 – 4 of the Project Registration Form are to be completed and submitted prior to start of the project.

E-mail the completed form to project@kempersystem.com. The project information will be reviewed, any technical corrections made directly on the form, and the form will then be returned.

[1] GENERAL PROJECT INFORMATION

The purpose of this section is to obtain basic information regarding the project. This includes project identification and location, tax exempt status, identification of the building owner and architect/engineer/consultant and type of project. The anticipated project size and start date helps with scheduling of KSA technical field personnel so that any necessary field support can be provided on a timely basis.

In addition, an option for additional quality assurance is available, by means of Electronic Field Vector Mapping.

[2] REQUESTED WARRANTY

The purpose of this section is to identify the warranty coverage that KSA will be expected to provide upon project completion. Not every project qualifies for every warranty type and duration. The KSA "WARRANTY AVAILABILITY AND FEE SCHEDULE" provides a description of available warranties, eligibility requirements, and associated fees.

Some warranties and riders are only available on a per-project basis, and usually have special technical requirements. Special approval by the KSA Technical Services Department is required.

[3] STRUCTURAL CONSTRUCTION TYPE

The purpose of this section is to identify the basic construction of the structure, both the deck/main substrate and the wall/flashing substrate.

[4] SUBSTRATE UNDER NEW KEMPER SYSTEM / COELAN

The purpose of this section is to identify the main substrate surface to which the Kemperol materials are to be installed. Kemperol materials are typically installed direct to the structural substrate, direct to an existing bituminous roof system, or applied over new insulation with cover board and/or mineral-surfaced base sheet.

The most common substrates are listed, along with related critical surface preparation requirements that are necessary for warranty eligibility. For a complete list of substrate review the Substrate Primer Selection Guide.

Substrate surfaces not listed must be approved by the KSA Technical Services Department.

[5] NEW KEMPER SYSTEM AND COELAN SYSTEM

The purpose of this section is to identify all the KSA system components that are intended for application. The material components that require identification: Primer, Resin, Fleece, Roofing Coatings, Traffic Coatings, Maintenance Coating, Modified Bitumen, and Coelan Coatings products.

The proposed KSA system assembly is reviewed by the KSA Technical Services Department to confirm that the correct primer will be used for the listed substrate surface, that the resin/fleece membrane meets requirements for warranty, and that the surfacing is compatible with the intended use of the Kemperol system.

[6] OVERBURDEN MATERIALS OVER NEW KEMPER SYSTEM

The purpose of this section is to identify all materials that are intended for installation over the KSA system assembly.

A final inspection of the KSA system must be performed by KSA technical field personnel prior to placement of any overburden materials.

[7] APPLICATOR'S PROJECT REGISTRATION CERTIFICATION STATEMENT

The purpose of this section is to obtain information regarding the Applicator and/or Contractor of Record for the project. The Applicator Firm is the company that will be installing the Kemper System, while the Contractor of Record is the firm whose name may appear on the warranty.

In addition, the Applicator is required to sign this form as a confirmation that the Kemperol system installation will be performed in a manner that meets KSA quality standards and follows KSA technical requirements.

Provision is made for the Applicator to request job start-up assistance and/or applicator training.

[8] PROJECT PLAN, DETAILS & PICTURES

The purpose of this section is to identify and record any non-standard installation details that are part of the KSA system application. The details should be submitted to the Technical Department in addition to this form.

Identification of the location of the Kemperol materials is an important part of establishing warranty coverage.

[9] PROJECT APPROVAL

This section is for the Kemper System America Technical Department use only. The reviewer may provide additional comment/requirement for the application to be eligible for a warranty.
